with date, time, array, math and information functions. The course focuses on practical examples that will help viewers easily transition to using Excel's most powerful formulas and functions in real-world scenarios. Topics include: □ Displaying and highlighting formulas □ Converting formulas to values □ Tabulating data from multiple sheets □ Understanding the hierarchy of operations in formulas □ Using absolute and relative references □ Creating and expanding nested IF statements □ Looking up information with VLOOKUP, MATCH, and INDEX □ Using the powerful COUNTIF family of functions □ Analysing data with statistical functions □ Calculating dates and times □ Analysing data with array formulas and functions □ Extracting data with text function For many Excel users the most important thing they do in Excel is work with formulas and functions. If you really want to take advantage of Excel's power, you need exposure to these features. We will start off by showing you some great shortcuts for building formulas and functions. Numerous variations for the powerful IF and VLOOKUP functions, vital statistical and math functions, and some date functions that could prove to be indispensable. We will show you how text functions can help you clean up flawed data. How powerful array formulas and functions give you even more analytical possibilities. We will show you how to use functions in combination with one another to achieve even greater power. Welcome to Excel 2016 Advanced Formulas and Functions. The skills acquired from this version are mostly applicable to newer versions of Excel. If you think that Microsoft Excel is only for business purposes, you are wrong. Many use it for various personal needs at home too. Some of the features that you should understand about Microsoft Excel to unlock the potentiality of this application are working with spreadsheets, cell formatting, various menus and toolbars, entering of data and editing the same, navigating between various spreadsheets, formula calculation, inserting various functions like date/time, mathematical functions, using of various charts that are available, inserting, editing and deleting comments on cells, etc. Computer Based Training (CBT) is a way to master MS Excel. This is where you take your own time to master the application. With the help of CBT, you get realistic, interactive and complete training. You get to learn right from what a beginner should learn to advanced level. Once the training is over, you would have mastered Microsoft Excel. You get to see simulations of Microsoft Excel application software. Some CBT also offer review quiz questions to gauge your understanding. CBT generally offer interactive, complete and comprehensive training. As it offers practice questions, you will be able to understand better and gain confidence in using the application. According to me, this is one of the best ways to learn Microsoft Excel. The concept of spreadsheeting has been around for hundreds of years. The process can be described as the ability to arrange numbers, characters and other objects into rows and columns. It is most common that spreadsheets only contain numbers and text. The software version of spread-sheeting basically takes the manual processes described above and puts them into an electronic format. Whilst the accounting industry which most commonly uses spreadsheets they can be used in any situation.

"In this Microsoft Excel Advanced Formulas and Functions training course, expert author Guy Vaccaro takes you beyond the basics of Excel, and teaches you how to use the advanced formulas and functions in this spreadsheet program by Microsoft. This course is designed for users that already have a basic working knowledge of Excel. You will begin by reviewing the basic operations, such as sum and count syntax, function processing order, and knowing the troubleshooting tools. You will explore extended formula usage with 3D referencing, naming cells and absolute referencing. Guy proceeds to instruct you on how to look up and reference type functions using VLookup and HLookup. Other features that are covered in this computer based training include; generating random numbers and values, locating data using text functions, and learning to use an array formula to count unique entries. By the completion of this training course, you will be comfortable with using many of the advanced formulas and functions that this powerful spreadsheet software from Microsoft offers. Working files are included, allowing you to follow along with the author throughout the lessons."--Resource description page.

In this completely updated edition covering Excel 2019, previous versions, and Office 365, Microsoft Excel Functions & Formulas 5/E demonstrates the secrets of Excel through the use of practical and useful examples in a quick reference format. Easy to use and equipped with a variety of functions, Microsoft Excel is the tool of choice when it comes to crunching numbers, building charts, and analyzing tables. The book's extensive examples and added video tutorials make it an excellent resource for all Excel users who want to understand, create, and apply formulas. Experienced users will also find Microsoft Excel Functions & Formulas 5/E an excellent reference for many of the program's advanced formulas and functions. The text is easy to understand with numerous step-by-step instructions and the actual, ready to use, Excel screenshots of the input and output from the formulas. The book includes companion files with video tutorials, over 250 worksheet files of examples for numerous functions, formulas, and all the figures from the text. FEATURES Includes companion files with video tutorials, over 250 Excel worksheet examples, and all of the figures from the text (including 4-color) Completely updated to cover Microsoft Excel 2019, previous versions, and Office 365 Saves hundreds of hours with the latest Excel tips, worksheets, and shortcuts Written by a proven author with Microsoft Valued Professional(MVP) status The Companion Files are also available for downloading from the publisher by emailing proof of purchase to [info@merclearning.com](mailto:info@merclearning.com).

Expert Paul McFedries helps you master key Excel 2019 and Office 365 tools for building more powerful spreadsheets. Use Excel 2019 and Office 365 core features to build spreadsheets that solve business problems and deliver reliable answers. Drawing on his unsurpassed experience, Paul McFedries helps you make the most of formulas and functions, including the latest improvements to arrays, formula error handling, and statistics. McFedries' step-by-step projects walk you through handling key tasks, from building timesheets to projecting cash flow and aging receivables. His practical examples and clear instructions demystify intermediate- to advanced-level formula construction, and help you leverage Excel's most useful functions in your everyday work. Becoming an Excel expert has never been easier! By reading this book, you will:

- \* Improve business analyses by adding intelligence and knowledge to your models
- \* Replace cumbersome formulas with convenient predefined functions
- \* Radically simplify complex calculations with Office 365's new dynamic arrays
- \* Use conditional formatting to reveal anomalies, problems, or opportunities
- \* Calculate loan payments, interest costs, terms, and amortization schedules
- \* Project the future value of investments, and plan to achieve
