Drug information tailored for anesthesiology and critical care; drugs used in peri-operative and critical care settings

Get Free Anesthesiology Critical Care Drug Handbook Including Select Disease States Perioperative Management Lexicoms Drug Reference Handbooks

Prepared by noted critical care experts at the National Institutes of Health and leading medical centers, this handbook is a quick-reference guide to the choice and administration of drugs in critical care. It contains 126 easy-to-scan tables listing drugs of choice for specific clinical situations; dosages, dilutions, and infusion rates; and indications and adverse effects of drugs. Emphasis is on toxicities, compatibilities, and clinical considerations that would guide the choice of drug. This thoroughly updated Third Edition includes many new drugs and has an expanded section on neurologic and psychiatric therapeutics. This Third Edition is also available for PDAs. See Media Products section for details.

A must-have drug reference for anesthesia providers, critical care practitioners, and all healthcare professionals involved in the care of surgical or intensive care unit patients.

An essential reference text, the fifth edition of this popular book details drugs in anaesthesia and intensive care in an A-Z format. The book describes the pharmacokinetics and pharmacodynamics of all the drugs commonly used by anaesthetists. The A-Z organisation allows rapid access to specific information on the properties and characteristics of almost 200 drugs. The new edition includes a complete revision of all the featured drugs, and the addition of key new drugs. New diagrams of particular drug structures and comparison tables aid comparison of differences within a drug class for exam revision. Improved navigation in the index enables prompt discoverability of information. Written in a concise, bullet-point style to allow quick access to information, the book contains all necessary drug references for anaesthetists in training, consultant anaesthetists, intensive care nurses, and anaesthetic assistants.
