Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Farang; the Sequel is the long-awaited follow-up to Farang, which became an instant bestseller upon its release in Thailand. Iain Corness fell in love with Thailand in his youth and moved there permanently in 1997. As a settled farang, or foreigner, he enjoys a unique perspective on Thai life and all its eccentricities; looking in from the outside while also getting to see things most foreigners don't. The Japanese presence in Southeast Asia is treated variously with either suspicion or encouragement. Japan and Malaysian Development critically assesses different dimensions of Japan-Malaysia economic relations. The work presents a balanced collection of essays examining Japanese involvement in Malaysia. The volume also discusses the impact and consequences of Malaysian Prime Minister Mahathir's "Look East" policy, which advocated greater emphasis on trading relations with Japan.

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Daihatsu Mira - Wikipedia

This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

Dr Iain Corness is a medical practitioner, racing car driver, photographer, freelance journalist and first rate raconteur. The UK born expat, who fell in love with Thailand - both its people and its way of life - on holiday, and finally managed to move there permanently 20 years later. As a settled 'farang', or Westerner, he enjoys a unique perspective on Thai life and all its eccentricities. His anecdotes are full of the joys of life, and revel in the chaos and charm of 'the only country where you can be run over by a shop'.

From 1820 to 1990 the share of world income going to today's wealthy nations soared from 20% to 70%. That share has recently plummeted. Richard Baldwin shows how the combination of high tech with low wages propelled industrialization in developing nations, deindustrialization in developed nations, and a commodity supercycle that is petering out.

This volume consists of two parts. Part one discusses economic friction in the Asia-Pacific region from three aspects: macroeconomic and microeconomic friction, and that between the state and the market mechanism. In part two, four types of legal frameworks for dispute resolution are examined.
