I was considering so called "Default Settings" accessible in Intelligent Provisioning where you can configure profile (zipped XML files) which can be deployed via python-hpilo. However disk array options are very limited - only RAID level and strip size can be configured. You cannot create and customize array.

*Solved: Remote Smart Array configuration using CLI/API thr ...*

ACU is the main tool for configuring arrays on HP Smart Array controllers. It exists in three interface formats: the ACU GUI, the ACU CLI, and ACU Scripting. All formats provide support for standard configuration tasks (on page 6). ACU also provides support for advanced configuration tasks (on page 6).

*Configuring Arrays on HP Smart Array Controllers Reference ...*

I'm posting in the HP forum because this specifically seems to be a limitation of the HP Array bios setup you can't seem to create multiple logical drives over an array with the Built in (Pre-OS) array configuration.
