Lotus Evija: The Last of Its Kind

Conceived by Colin Chapman, the Lotus 72 is one of the most successful Formula 1 cars ever made. This innovative car – with its wedge-shaped profile, side-mounted radiators and inboard front brakes – was driven during 1970 by Jochen Rindt, Formula 1's posthumous World Champion, and also gave Emerson Fittipaldi the World Champion's crown in 1972. Here, in this new Haynes Manual, is a unique perspective on what it takes to restore, maintain and race a Lotus 72, as well as an insight into the design and engineering of this legendary racing car.

The Lotus 98T was the 1986-season, JPS-liveried F1 car driven by Ayrton Senna and team-mate Johnny Dumfries. Senna took eight podium positions, including two wins in the car, taking the fight to the superior McLarens and Williams. The 98T was one of the ultimate incarnations of an F1 car, powered by a Renault V6 turbo engine, which is conservatively estimated to have produced up to 1,300bhp at full boost. Senna was mighty to behold at the wheel of the 98T - he took pole position at eight of the season's 16 races, with victories in Spain and Detroit, famously crossing the line alongside Nigel Mansell in Spain, to win by 0.014s. This Manual, extensively illustrated with both period photographs and technical illustrations and photographs of a recently restored car, provides a fascinating insight into the design, evolution, operation, maintenance and restoration of the Lotus 98T.

Designed to suit new regulations, after ground-effect cars were banned at the end of 1982, the BT52 was very distinctive, with short, angular sidepods and a dart-shaped profile. During the 1983 season, the innovative Brabham team, with now F1 supremo Bernie Ecclestone at the helm, introduced the first high-pressure fuel rig seen in F1, to speed up refuelling stops, and used 'ovens' to pre-heat tyres prior to pitstops. This manual provides a fascinating insight into the design, evolution, operation and maintenance of the Brabham BT52.

The Lotus Elan was Lotus's definitive roadster. It replaced the elegant but expensive Lotus Elite and was the first car to employ the innovative Lotus steel backbone chassis. The original Elan was produced as a two-seat, open-top sports car and hardtop coupe from 1962 to 1973. The range was extended by the addition of the 2+2-seater Plus 2 from 1967 to 1974. Lotus introduced an all-new front wheel drive Elan in 1989, the M100, which was produced until 1995. Lotus Elan studies the history and development of all the Elans and describes each model in detail. It gives technical details for all models, examines unusual conversions, and includes driving experiences from Elan owners. A complete and readable resource for all Lotus Elan owners and motoring enthusiasts who aspire to own one of these iconic British sports cars. Superbly illustrated with 250 colour photographs.Matthew Vale is a motoring author and passionate Lotus Elan enthusiast.

The McLaren M23 first appeared in 1973, and became McLaren's first World Championship winner when Emerson Fittipaldi took the title in 1974. As depicted in the new feature film Rush, James Hunt gloriously repeated the feat in 1976 after a mighty season-long battle with Niki Lauda. Here, in this new Haynes Manual, is unique perspective on what it takes to restore, maintain and race a McLaren M23, as well as an insight into the design, engineering and development of this landmark Formula 1 car.

Lotus introduced the Type 75 Elite in 1974. Being a full four-seater coupe with an opening glass tailgate, it was designed to carry a family in comfort while retaining Lotus' trademark, excellent road holding and handling. Perhaps most importantly, it was the first - and successful - step in Colin Chapman's plan to move upmarket and away from Lotus' kit car image. The Elite gave rise to two derivatives, the Eclat and the Excel. The Eclat was a restyled coupe version, sacrificing the Elite's unique rear styling and good rear passenger headroom for a more stylish exterior. With its conventional coupe styling, the Eclat was more mainstream than the Elite, and it was in the end the better seller. In turn, the Eclat spawned the Excel, the last of the Elite-inspired family. Matthew Vale looks at the history of these unusual Lotus models, and gives a thorough guide to buying and owning the cars today. Of interest to all motoring enthusiasts and Lotus owners in particular, it includes information on buying and owning the cars today, specifications, owner's experiences and technical information. Superbly illustrated with 130 colour photographs, both period and contemporary.

The Lotus Elan was Colin Chapman and Lotus' first affordable road car, produced from 1962 and, along with its larger Plus 2 variant, until 1974. As a replacement for the expensive Lotus Elite, the Elan and Plus 2 were both successful sports cars, which carried Lotus through the 1960s and into the 1970s. Starting with a brief history of Lotus and the Elan, Lotus Elan & Plus 2 Source Book provides a detailed originality guide to the Elan and Plus 2, identifying the design changes Lotus made to the models through their lifetimes. An 'owner's guide' provides detailed information on owning and maintaining the cars in tip-top condition, and gives details of common faults and upgrades. The restoration guide gives any potential restorer the information to carry out the tasks needed to bring one of the these cars back from the dead. With anecdotes and experiences from current and previous owners of Elans and Plus 2s, along with many colour photographs the book provides a valuable insight into owning running and racing these iconic cars.

Enlarged re-issue of Autobooks manual with maintenance, overhaul, instructions and technical data for all components. Covers all Elan models 1962-74 and has a new chapter on history.
