Part 1 of 1: Checking manual transmission fluid. Materials Needed. Fluid pump; Jack and jack stands; Ratchet with sockets, standard and metric ; Torque wrench; Transmission fluid; Wheel chocks; Step 1: Position the wheel chocks. Place the wheel chocks around the rear tires. Step 2: Jack up the vehicle. Using the hydraulic floor jack, lift the front of the vehicle one side at a time at the manufacturer's suggested jacking points.

## ~~How to Check Manual Transmission Fluid | YourMechanic Advice~~

Disengage the clutch and apply the handbrake. Make sure the engine has been switched off for at least 2 minutes so that the oil is "resting" and at the bottom of the sump. If your car has been used for more than 30 minutes, allow the engine to rest for a few minutes so that the transmission fluid can cool down.

## ~~How to check manual transmission fluid? (MTF) | ELF.com~~

Your mechanic drains the transmission fluid from the transmission, replaces the filter, and then refills the transmission with fresh, new fluid. Gravity does all the work here. In a manual transmission, this procedure lets you completely drain and replace nearly all of the oil. But in an automatic, this process will replenish only about half of the fluid.

## ~~Transmission Fluid Change vs. Flush: Which Is Right for You?~~

# Download Free Manual Transmission Fluid Replacement

Generally, it is recommended to change your manual transmission fluid after you cover at least 30,000 miles or to the max, 60,000 miles. The fluid changing gap depends on the car model greatly. If in case you are stressing your transmission, changing these fluids becomes essential after covering 15,000 miles.

## ~~How to Replace Manual Transmission Fluid? A Complete ...~~
