Oracle Database 12 c, released in 2013, was designed for the Cloud, featuring a new Multitenant architecture, In-Memory column store, and support for JSON documents. Oracle Database 12 c helps customers make more efficient use of their IT resources, while continuing to reduce costs and improve service levels for users.

Introduction to Oracle Database
Identify the major structural components of the Oracle Database 12c; Create reports of aggregated data; Write SELECT statements that include queries; Retrieve row and column data from tables; Run data manipulation statements (DML) in Oracle Database 12c; Create tables to store data; Utilize views to display data; Control database access to specific objects

Oracle Database: Introduction to SQL
In this Oracle Database 12c: Introduction for Experienced SQL Users training, you learn about Oracle Database 12c, the database environment and the Oracle SQL Developer tool. Expert Oracle University instructors will teach you how to create and manage tables, synonyms, sequences, indexes and views.

Oracle Database 12c: Introduction for Experienced SQL Users
This course offers an introduction to the Oracle Database 12c database technology. It covers the concepts of relational databases and the powerful SQL programming language. It also demonstrates essential SQL skills for writing queries against single and multiple tables, manipulating data in tables, and creating database objects.

Oracle Database 12c Introduction to SQL | Global Knowledge
The Oracle Database: SQL Workshop I Ed 3 course offers students an introduction to Oracle Database 12c database technology. The students are also introduced to Oracle Database Exadata Express Cloud Service. In this class students learn the concepts of relational databases and the powerful SQL programming language.

Oracle Database 12c R2: SQL Workshop I
Oracle Database 12c, released in 2013, was designed for the Cloud, featuring a new Multitenant architecture, In-Memory column store, and support for JSON documents. Oracle Database 12c helps customers make more efficient use of their IT resources, while continuing to reduce costs and improve service levels for users.

Introduction to Oracle Database
Run data manipulation statements (DML) in Oracle Database 12c; Create tables to store data; Utilize views to display data; Control database access to specific objects; Manage schema objects; Display data from multiple tables using JOIN syntax; Use conditional compilation to customize the functionality in a PL/SQL application without removing any source code

Oracle Database: Introduction to SQL/PLSQL Accelerated
Oracle Database: Introduction to SQL From learning path: Oracle Database 12c Administrator Certified Associate or Oracle Database SQL Certified Associate or In the subscription: Oracle Database Learning Subscription or Unlimited Learning Subscription - All Technology or

Oracle Database SQL | Oracle University
Oracle Database 12c, released in 2013, was designed for the Cloud, featuring a new Multitenant architecture, In-Memory column store, and support for JSON documents. Oracle Database 12c helped DBAs make more efficient use of their IT resources, while continuing to reduce costs and improve service levels for end users. Integration and memory performance

Introduction to Oracle Database
Oracle Database Vault separation of duty controls can be customized and organizations with limited resources can assign multiple Oracle Database Vault responsibilities to the same administrator, but using separate accounts for each separation-of-duty role to minimize damage to the database if any one account is stolen and leveraged.

Introduction to Oracle Database Vault
Oracle Database uses authentication, authorization, and auditing mechanisms to secure data in the database, but not in the operating system data files where data is stored. To protect these data files, Oracle Database provides Transparent Data Encryption (TDE). TDE encrypts sensitive data stored in data files.

Introduction to Transparent Data Encryption - Oracle
Database. Oracle Autonomous Database is a unified database offering that bring Oracle database technology into an automated, self-healing platform. With support for multiple modes and data structures, we automate all routine database tasks, saving countless hours of manual, human effort and ensuring higher performance, reliability, security ...
