So, I tried the Mint Live and the wifi settings never changed. So, I thought everything was going good. I've used Windows from 95 to Windows 10, about 30 years. And yesterday I said 'that's it, now is the perfect time to plunge into Linux. So, I installed Mint and I went into the update manager and no signal.

~~Linux Mint Forums~~

Also, running an OS from a USB drive is slower than from a hard drive, so don't judge Linux Mint's performance based on this experience. When you're ready to take the plunge,

Me personally I had a crap experience with Windows, and decided to take the plunge into Linux. While I get frustrated, and I don't get to contribute the way I would like due to a lack of knowledge still, i don't want to promote something that LOOKS like XP or Vista, only for people to get confused when it does not WORK like XP or Vista.
