Carole Gene Marer spent her girlhood dreaming of meeting Rock Hudson, but when she finally had the chance—on her second date with her future husband, television mogul Aaron Spelling—she was so shy she hid all night in the powder room. How Candy morphed from that quiet girl into a seemingly-confident, stylish trophy wife, mistress of the largest house in Los Angeles (70,000 square feet when you count the attic) is at the heart of Stories from Candyland. The life Candy created for her family—her husband and children Tori and Randy—was fabulous, over-the-top, and often magical. So what if California Christmases don't come with snow? Let's make some on the tennis court! How do we take a cross-country family vacation with a dad who doesn't fly? By private train car, of course (with an extra for the fifty-two pieces of luggage). The kids want to dress up for Halloween? No problem, why not call in Nolan Miller to design their costumes? Candy had a hand in some of the most beloved television shows of all time (she once stopped production on "Dynasty" because Krystle Carrington's engagement ring was not spectacular enough), has entertained half of Hollywood in epic fashion, and lives an enviable life. But under all the fun and showmanship lies a more interesting character, still wrestling with some of the insecurities of her ing é nue self. Oprah threw her into a major panic with a discussion of hoarding. A lifelong humming habit evolved as a unique coping mechanism. And there's nothing like being defined as, "well, you know, complicated" by your daughter on television and in her own book. Stories from Candyland sparkles with glamour and grand gestures. But it also satisfies with some more intimate Candy concerns: why being a perfect wife and mother was so important to her, how cooking and cleaning can keep the home fires burning, why collections matter, and whether dogs are better judges of people than people are. Visit Candyland in these pages and get a glimpse of a generous, glittering world revealing many of its surprising and funny secrets for the first time.

A memoir by the actress best known for her role on "Beverly Hills, 90210" challenges popular misconceptions about her privileged life while discussing such topics as her relationship with her late father, her marriages, and her parenting experiences.

After thirty-eight happy years of marriage to influential producer Aaron Spelling, raising two children in Hollywood, and co-managing one of the largest estates in the country (finally selling Spelling Manor, as detailed on her HGTV series, for \$85 million), Candy is now adjusting to life on her own--downsizing to a Century City condo. She's ready to share the most intimate details of her life with Aaron; how his illness caused her to question her identity; and how she's reinvented herself as an independent woman, businesswoman, and television personality. Along the way, Candy reveals all-new dishy stories including those of Hollywood friends Joan Crawford, Bette Davis, Michael Jackson, Janet Leigh, Dean Martin, and Elizabeth Taylor (her lifelong rival over their jewelry).

Four children have been chosen to compete in a national competition to find the tastiest confection in the country. Who will invent a candy more delicious than the Oozing Crunchorama or the Neon Lightning Chew? Logan, the Candymaker's son, who can detect the color of chocolate by touch alone? Miles, the boy who is allergic to merry-go-rounds and the color pink? Daisy, the cheerful girl who can lift a fifty-pound lump of taffy like it's a feather? Or Philip, the suit-and-tie wearing boy who's always scribbling in a secret notebook? This sweet, charming, and cleverly crafted story, told from each contestant's perspective, is filled with mystery, friendship, and juicy revelations.

Take chocolate candy, add a family business at war with itself, and stir with an outsider ' s perspective. This is the recipe for True Confections, the irresistible new novel by Katharine Weber, a writer whose work has won accolades from Iris Murdoch, Madeleine L ' Engle, Wally Lamb, and Kate Atkinson, to name a few. Alice Tatnall Ziplinsky ' s marriage into the Ziplinsky family has not been unanimously celebrated. Her greatest ambition is to belong, to feel truly entitled to the heritage she has tried so hard to earn. Which is why Zip ' s Candies is much more to her than just a candy factory, where she has worked for most of her life. In True Confections, Alice has her reasons for telling the multigenerational

saga of the family-owned-and-operated candy company, now in crisis. Nobody is more devoted than Alice to delving into the truth of Zip ' s history, starting with the rags-to-riches story of how Hungarian immigrant Eli Czaplinsky developed his famous candy lines, and how each of his candies, from Little Sammies to Mumbo Jumbos, was inspired by an element in a stolen library copy of Little Black Sambo, from which he taught himself English. Within Alice ' s vivid and persuasive account (is her unreliability a tactic or a condition?) are the stories of a runaway slave from the cacao plantations of C ô te d ' Ivoire and the Third Reich ' s failed plan to establish a colony on Madagascar for European Jews. Richly informed, deeply moving, and spiked with Weber ' s trademark wit, True Confections is, at its heart, a timeless and universal story of love, betrayal, and chocolate.

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author" "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.
