STORIES FROM THE FOSSIL RECORD Flashcards | Quizlet

Fossils represent the only evidence we have of life in the past. Fossils can provide clues that will help us answer questions. Let's look at some fossils that provide such clues.

Past Lives - Page 1

Some organisms have structures that record their ages. For example, annual wood rings are formed as a tree trunk grows. The growth rings tell us how long an individual has lived.

Past Lives - Page 2a

It is a sign that fossil energy is no longer seen as a reliable money-maker, and investors are looking to new, clean energy sources to underpin future growth. In short, the energy transition is ...

New York Divests From Fossil Energy In Nod To The Ongoing ...

Fossil record, history of life as documented by fossils, the remains or imprints of organisms from earlier geological periods preserved in sedimentary rock. In a few cases the original substance of the hard parts of the organism is preserved, but more often the original components have been replaced by minerals deposited from water seeping through the rock .

fossil record | Definition & Facts | Britannica

The growth rings in these fossil oyster shells tell us how old the animals were when they died. As with the fossil tree, one ring equals one year of growth for these oysters. A lot of organisms have features that reveal details about their lifetime.

Past Lives - Page 2b

Paleoecology is the study of ancient organisms and how they interact with the environment and with one another.. We can use evidence from fossils to understand the ecology of ancient organisms. Let ' s look at some fossils that provide such clues.
