### *Timing Belt - Timing Belt Information & Guide*

Timing belts must be replaced at the manufacturer's recommended distance and/or time periods. Failure to replace the belt can result in complete breakdown or catastrophic engine failure, especially in interference engines. The owner's manual maintenance schedule is the source of timing belt replacement intervals, typically every 30,000 to 50,000 miles (50,000 to 80,000 km).

### *Timing belt (camshaft) - Wikipedia*

Your timing belt should be replaced every 50,000–70,000 miles, depending on your car's

make and model. Also, make sure you understand if your engine is an interference engine or a non-interference engine. In an interference engine, the valves and piston share the same airspace and the timing belt keeps them from touching. This is why you'll have a major engine failure on your hands if the belt breaks or skips.

### *How to Know When to Replace Your Timing Belt*

To do this, the white line on the timing belt needs to be aligned with the notch on the crankshaft pulley at the 9 o'clock position. With the belt in position, fit the crankshaft

*31316844 Timing belt set, Tensioner pulley, Timing belt ...*

A timing belt synchronizes the rotation of the crankshaft and camshaft(s) ensuring the proper timing and allows the engine's valves to open and close during each cylinder's firing. The operation of this belt is critical in preventing the pistons from striking the valves causing damage in an 'interference' engine.
