This volume of plays contains Edward Albee's four most famous one-act works. They are Death of Bessie Smith, Zoo Story, American Dream, and Sand Box.

Twenty tales of deceit, murder, and madness from the king of short mysteries They find the third body facedown in the wet grass, its head nearly split in half by the axe. The psychopath has claimed three in twenty-four hours—a sickening toll that forces the police department to let the aging Inspector Fleming stave off retirement for one more case. The cop races to catch the axe maniac before he kills again, lest this final assignment become the one that ruins his career. There are killers in many of the stories in this collection, and a few great detectives, too. There is a gang of old war buddies who have decided to pick up their guns again, a scientist murdered in the wilds of Canada, two hundred miles from civilization, and a young office worker convinced she's being followed by a man with bushy eyebrows. Edward D. Hoch understands crime, and knows that evil often lurks behind the kindest smiles.

Includes the complete scripts for Albee's first 3 plays

Gathers stories by Joyce Carol Oates, Willa Cather, Barry N. Malzberg, Theodore Sturgeon, Stephen Crane, H.G. Wells, E.F. Benson, H.P. Lovecraft, Jack London, Bram Stoker, Richard Matheson, and Jack Vance

Much has been written about the care of research animals. Yet little guidance has appeared on protecting the health and safety of the people who care for or use these animals. This book, an implementation handbook and companion to Guide For the Care and Use of Laboratory Animals, identifies principles for building a program and discusses the accountability of institutional leaders, managers, and employees for a program's success. It provides a detailed description of risks-- physical and chemical hazards, allergens and zoonoses, and hazards from experiments--which will serve as a continuing reference for the laboratory. The book offers specific recommendations for controlling risk through administrative procedures, facility design, engineering controls, and periodic evaluations. The volume focuses on the worker, with detailed discussions of work practices, the use of personal protective gear, and the development of an emergency response plan. This handbook will be invaluable to administrators, researchers, and employees in any animal research facility. It will also be of interest to personnel in zoos, animal shelters, and veterinary facilities.

Prentice Hall Literature, Penguin Edition ((c)2007) components for Grade 7.
